

ISCOPIA ANNOUNCES THE LAUNCH OF THE AQS™ SERVICE SUITE

For immediate release.

Montreal, (June 30, 2009) - Iscopia, a leading provider of on-demand assessment delivery technology for talent management, announced today the launch of AQS™, a new service suite that includes a series of services designed to allow users to qualify all of their job applicants quickly, simply and economically.

Iscopia's AQS™ (Applicant Qualification System) is a one-stop shop for all applicant qualification needs. The services can be ordered and customized using Iscopia's platform or embedded via web services into existing applications such as ATSs and ERPs.

These tools include:

- **i*attract** - employer branding
- **i*rank** - applicant qualification and ranking
- **i*screen** - phone screening and scoring
- **i*interview** - interview guide and scoring
- **i*reference** - online reference check
- **i*assess** - in depth assessment
- **i*verify** - online background check

AQS™ comes pre-loaded with hundreds of templates of job profiles including for example roles such as engineer, nurse, customer service and sales rep. New job profiles can be added in a matter of hours.

AQS™ is available on a subscription basis. It is designed as a white label offering and is easily configurable with the user's brand and colors.

User and candidate experiences are 100% online.

AQS™ appeals to small and medium companies who wish to qualify candidates or employees in an economical way and to large companies looking for a centralized access to qualification services.

About Iscopia

Iscopia provides web based products and software on demand technology (SaaS) that helps managers and recruiters make sound hiring, employee development and succession decisions. Our award-winning technology is easy to use, fast and cost-effective.
